

Intensive Treatment Systems

MOBILE MAT UNIT

“*Shame corrodes
the very part of us
that believes we
are capable of
change.*”

DR. BRENE BROWN

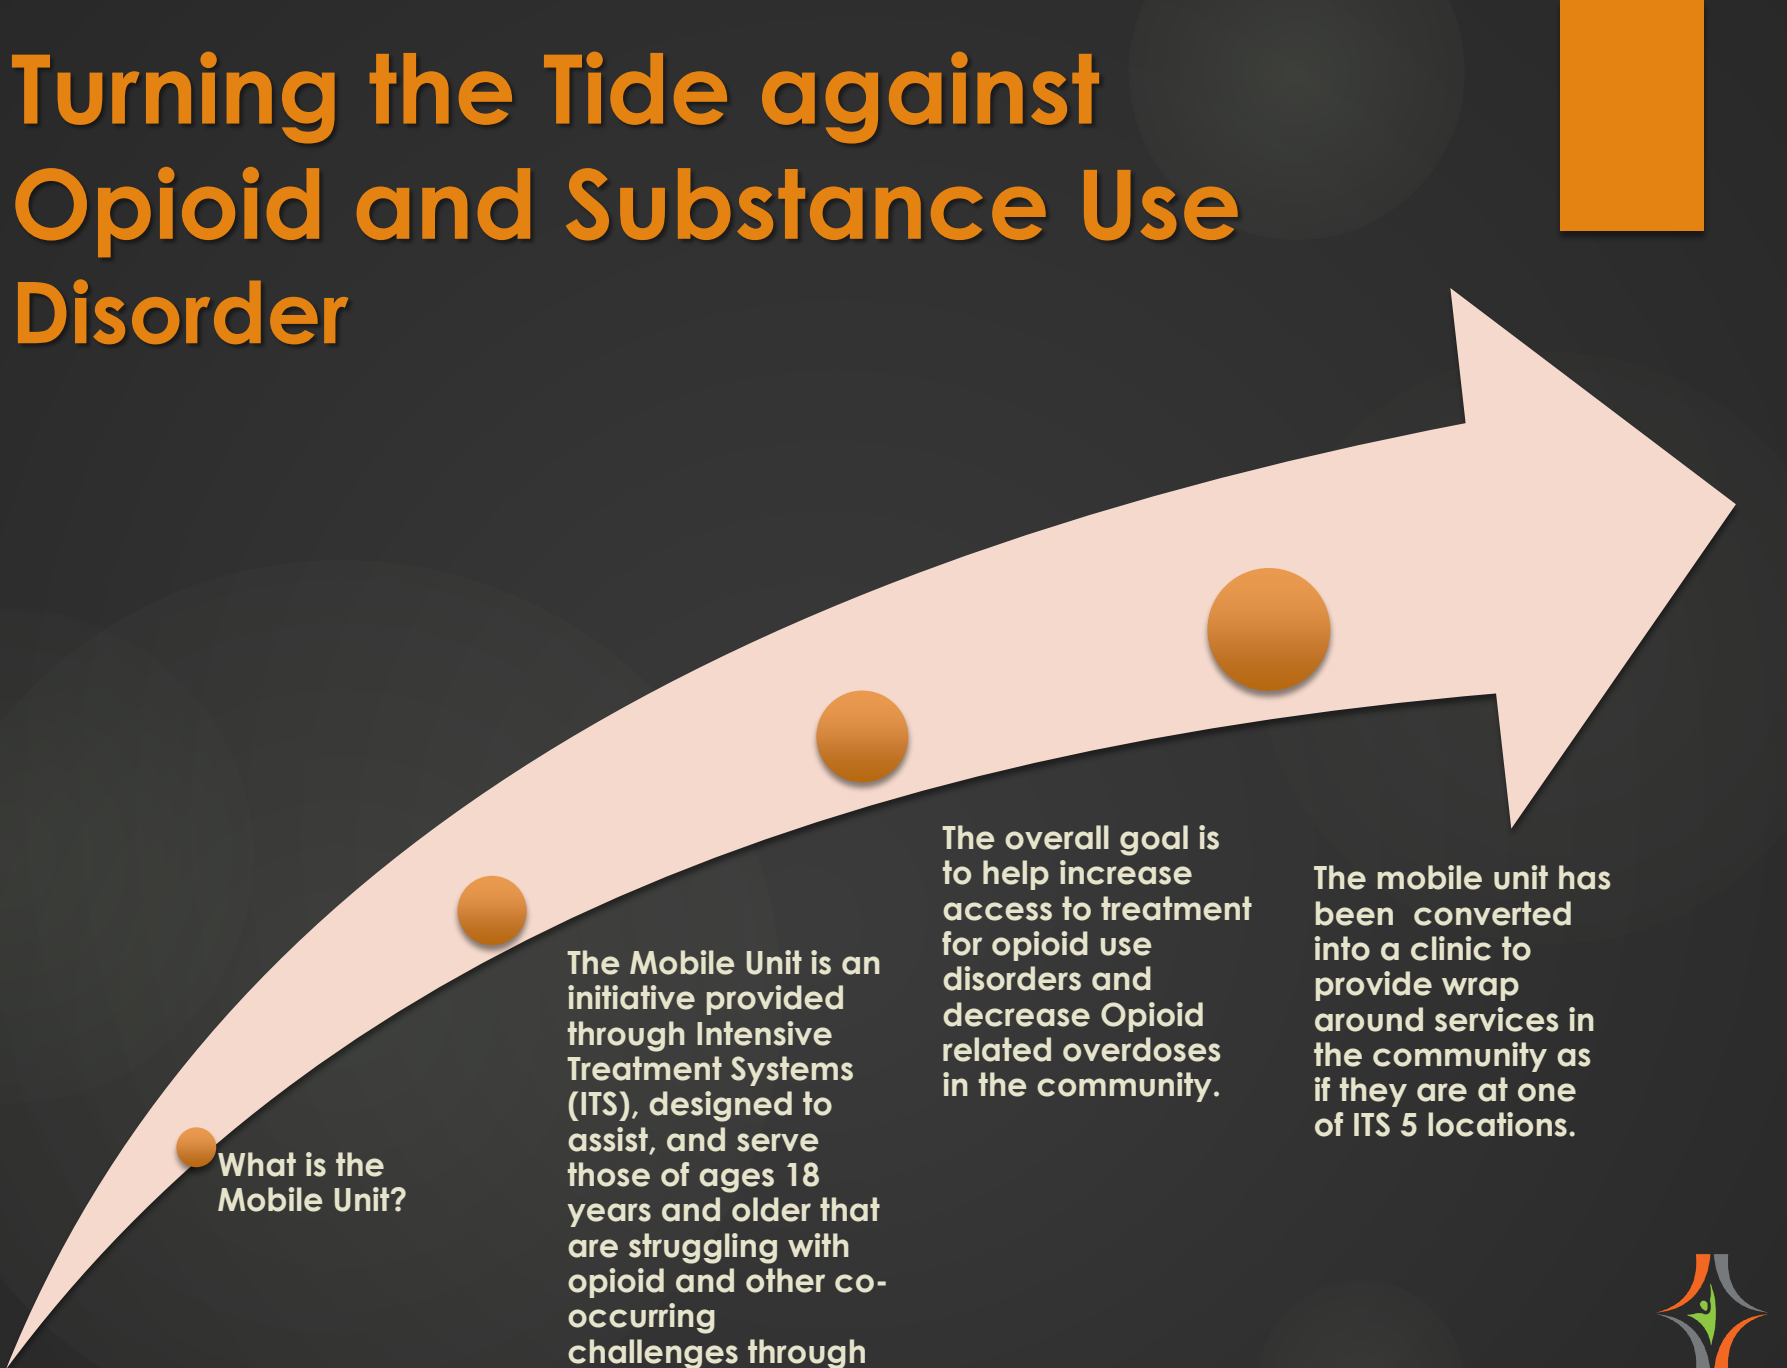

Intensive Treatment Systems

ITS has been providing MAT treatment in Phoenix for almost 30 years.

- We are an accredited, Integrated Care Specialist offering an outpatient substance use treatment program. We provide Medication Assisted Treatment (MAT) to patients who are affected by Opioid Use Disorder (OUD) and/or Alcohol Use Disorder.
- We work with all 7 AHCCCS Health Plans, TriWest, AIHP
- Funding available to treat people with OUD who have no insurance or who are under insured
- We provide psychiatric services for general mental health and severe mental illness (SMI)
- We are an AHCCCS designated Access Point Outpatient Clinic – open 24 hours a day/7 days a week
- We offer inhouse Transportation to or from any appointment

Turning the Tide against Opioid and Substance Use Disorder

What is the
Mobile Unit?

The Mobile Unit is an initiative provided through Intensive Treatment Systems (ITS), designed to assist, and serve those of ages 18 years and older that are struggling with opioid and other co-occurring challenges through MAT services.

The overall goal is to help increase access to treatment for opioid use disorders and decrease Opioid related overdoses in the community.

The mobile unit has been converted into a clinic to provide wrap around services in the community as if they are at one of ITS 5 locations.

Objectives

- **Conduct outreach to touchpoints for high-risk opioid use such as areas with individuals experiencing homelessness, syringe distribution locations, shelters, and SUD treatment programs. The goal is to gain the respect and trust of the high-risk individuals using substances in the community.**
- **Complete MAT inductions and provide patient-centered care while the individual reaches a state of stability**
- **Promote harm-reduction strategies based on patients' goals, preferences, and life circumstances.**
- **Establish a relationship with patients and help navigate obstacles to follow up treatment or other wrap-around services.**
- **Advocate for a harm-reduction approaches to patients and community members to reinforce evidence-based, non-judgmental approaches so that patients who use substances receive equal access to care.**
- **Decrease signs and symptoms of OUD and support the individual process of recovery without a specific endpoint.**

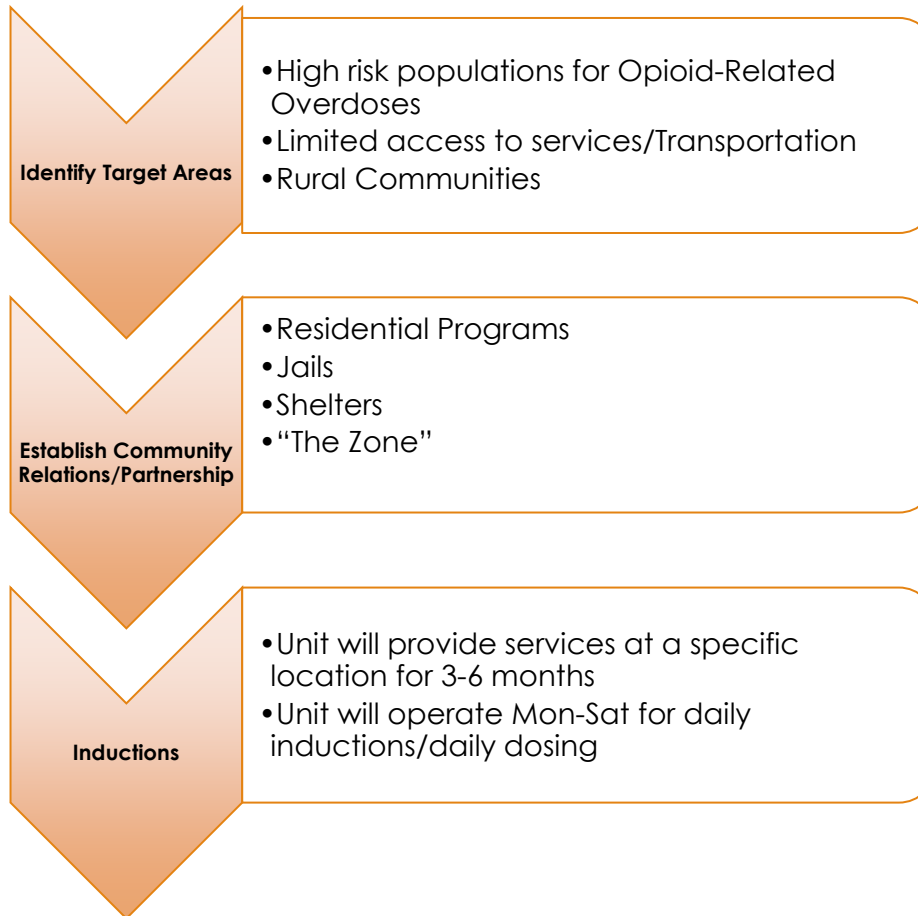

Mobile Services

- Medication Assisted treatment (methadone, suboxone, vivitrol)
- Naloxone
- Integrated care services
- Psychiatric services
- Counseling

- Case Management
- Peer Support Services
- Lab services (Urinalysis & blood draw)
